

Skyn Day in Barcelona

Skyn Concept - high performance digital dentistry

 **Corus Academy**

July 6th

09:30h - 19:00h

(limited seating)

NATURAL MORPHOLOGY
UNTOUCHED IN FORM AND TEXTURE BY ANY HUMAN HAND
CAD/CAM - DESIGNED AND MILLED
NO STAINS, NO GLAZE
JUST SKYN...

by smile designer **LIVIO YOSHINAGA**

ABOUT US

SKYN Concept represents a unique approach to work style, combining various protocols that can be tailored to suit individual preferences and create personalized workflows.

It introduces a groundbreaking concept in dentistry, where humans focus on tasks that cannot be replaced, while machines handle strategic actions that require unmatched quality, speed, and precision.

Livio Yoshinaga, the visionary creator, teamed up with Dr. Fabricio Guarnieri, a skilled dentist and technician, to elevate SKYN Concept to new heights. Together, they established the SKYN Lab and Research & Development area at the Sao Paulo headquarters. This innovative space encompasses a private dental office, an education center, and a cutting-edge digital lab, forming a well-structured tripod.

The addition of Prof. Mario de Goes, a dedicated dentist and prolific researcher, further fortified SKYN Concept with scientific expertise, blending the best elements of technology and design (Livio Yoshinaga), clinical and lab experience (Fabricio Guarnieri), and scientific knowledge (Prof. Mario de Goes).

Skyn Day Course at Corus Academy in Barcelona

How to empower your office using digital tools & knowledge ?

Achieving superior quality, precision, and, most importantly, predictability in dentistry has been a challenge that could only be overcome in the digital realm.

With this 1 day course, we take the initial stride towards introducing high-performance digital dentistry to Spain, where our philosophy can be shared in the field of Smile Design, attaining a harmonious balance between Aesthetics and Occlusion.

Our primary objective was to replace human hands in this domain, thereby democratizing dentistry and enabling more individuals to achieve exceptional outcomes. While highly skilled dental technicians are adept with their hands, limitations in production time and exorbitant costs restrict access for most dentists worldwide.

SKYN Concept aims to make top-quality dentistry more accessible to a larger population.

FINAL PROGRAM

Thursday, July 6th - 09:00h - 18:00h

- INTRODUCTION TO DIGITAL DENTISTRY & SKYN CONCEPT
- DIGITAL DOCUMENTATION - PHOTO, VIDEO AND SCAN
- THE FIRST VISIT PROTOCOL - FACE, SMILE, OCCLUSION AND POSTURE ANALYSIS
- SMILE DESIGN - SIMPLE, QUICK AND COMPLETE USING 3D INFORMATION
- PSYCHOLOGY IN DENTISTRY - SELF IMAGE & SELF ESTEEM
- THE MOCKUP SESSION - CONCEPT, STRATEGY AND TECHNOLOGY
- THE "SMILE STUDIO" CONCEPT - EMOTIONAL DENTISTRY AT ITS FULL POWER
- INTRAORAL SCANNING - THE BENEFITS BEYOND DIGITAL IMPRESSION
- DIGITAL DOCUMENTATION - 1 PHOTO & 1 VIDEO
- SMILE DESIGN - 2D AND 3D - WHICH MOCKUP TYPE TO SELECT ?
- OCCLUSION IN DIGITAL - ANALYSIS, DIAGNOSIS AND 3D DYNAMIC RECONSTRUCTION
- CREATING A PATIENT PRESENTATION USING DIGITAL TOOLS
- 3D COMMUNICATION PROTOCOL WITH YOUR LAB
- CLINICAL QUALITY CONTROL USING ANY INTRAORAL SCANNER
- OCCLUSION STABILIZATION DEVICES
- 3D BITE - 3D PRINTED RESTORATIONS
- ARCHITECTURE, MARKETING & SALES - BUILDING YOUR BUSINESS

INTRODUCTION TO DIGITAL DENTISTRY

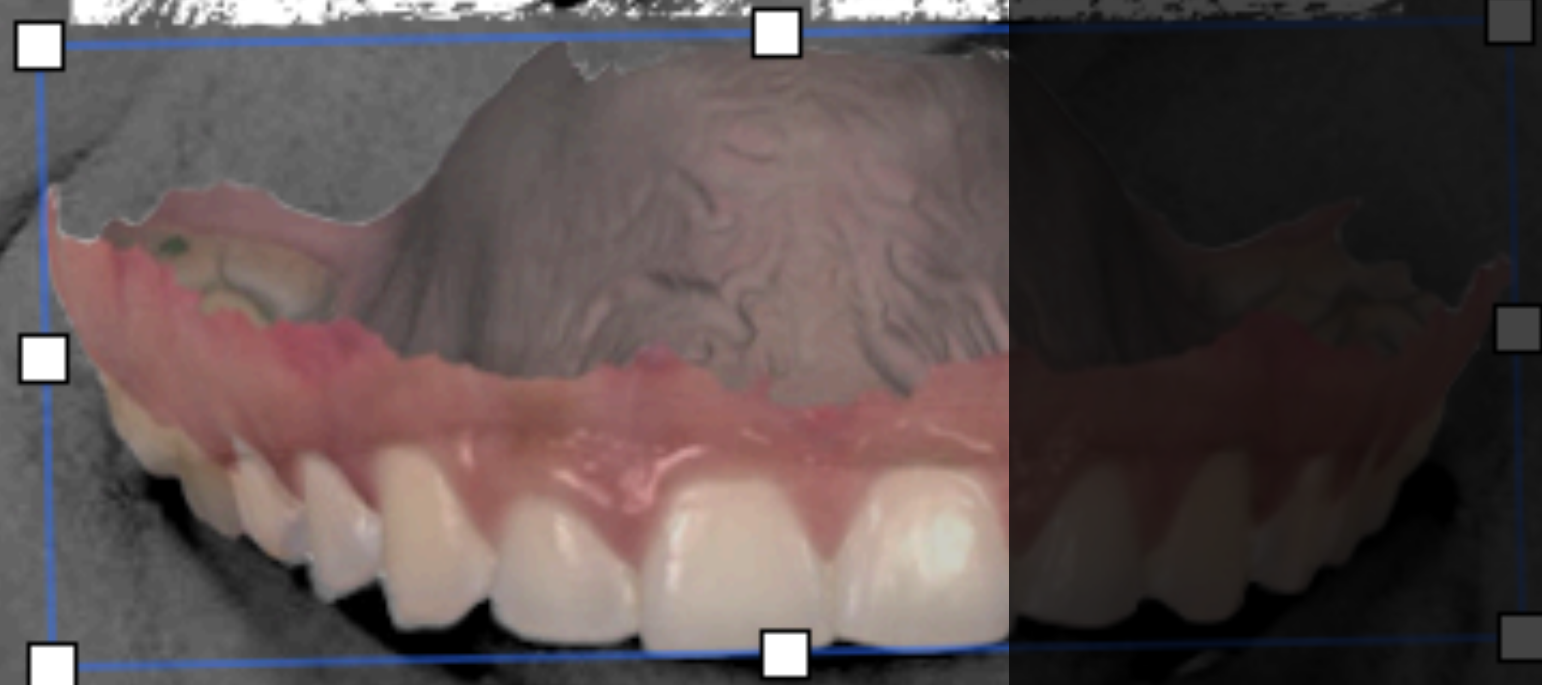

Introducing the new tools of digital dentistry. The evolution of smile design going through DSD (Digital Smile Design) until reaching SKYN Concept. Understanding intraoral scanning, the design process, 3D printing and 4/5 axis milling machines. The impact in the industry and why there is no way back making digital dentistry a reality and not a choice.

Why one photo?

DIGITAL DOCUMENTATION - PHOTO, VIDEO AND SCAN

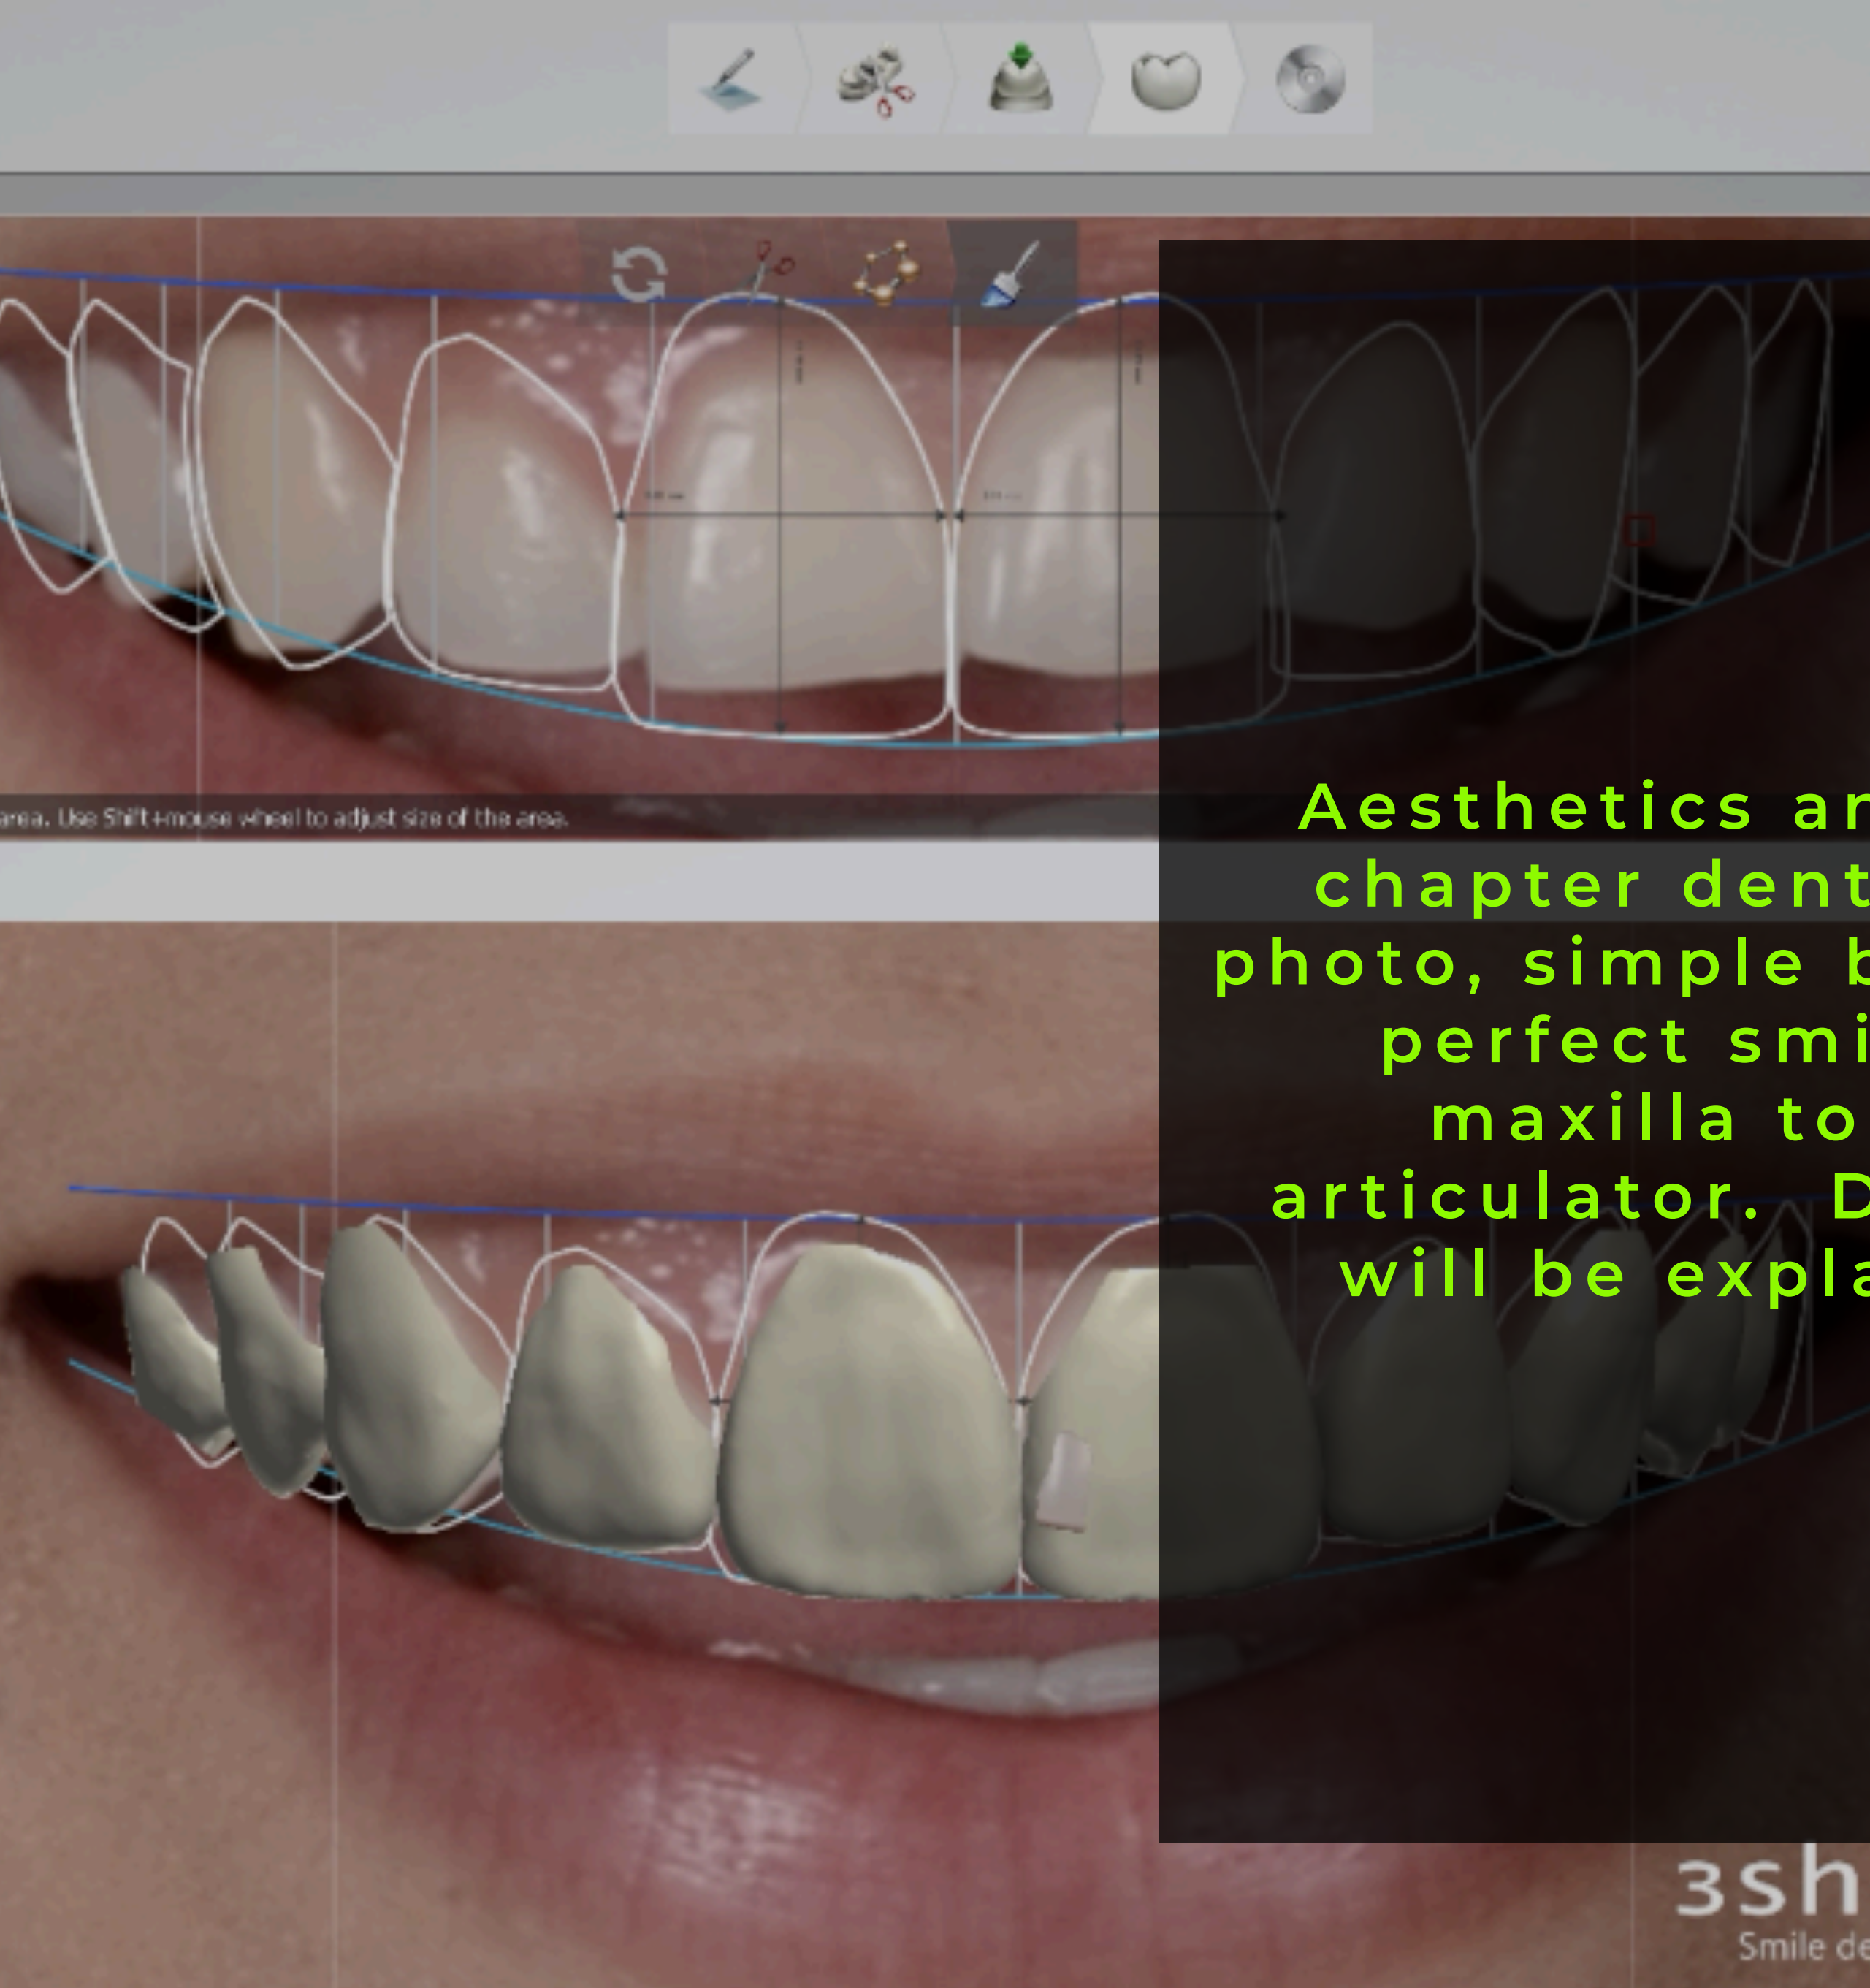

Dentistry is communicated mostly by photography. Slides are part of our routine on a daily basis and this was the first area to become digital. Understanding How digital photography replaced completely conventional film photography will help dentists to understand digital video and mainly digital impressions through intra oral scanning technology.

→ MAXILLA

DESIGN IN 2D & 3D

Aesthetics and Function cannot be separated. In this chapter dentists will understand the need of a single photo, simple but full of details as it will guide us for a perfect smile design as well as to position patient's maxilla to guide the bite for the mandatory digital articulator. Draft design in 2D and its evolution to 3D will be explained with different levels of complexity.

PSYCHOLOGY IN DENTISTRY - SELF IMAGE & SELF ESTEEM

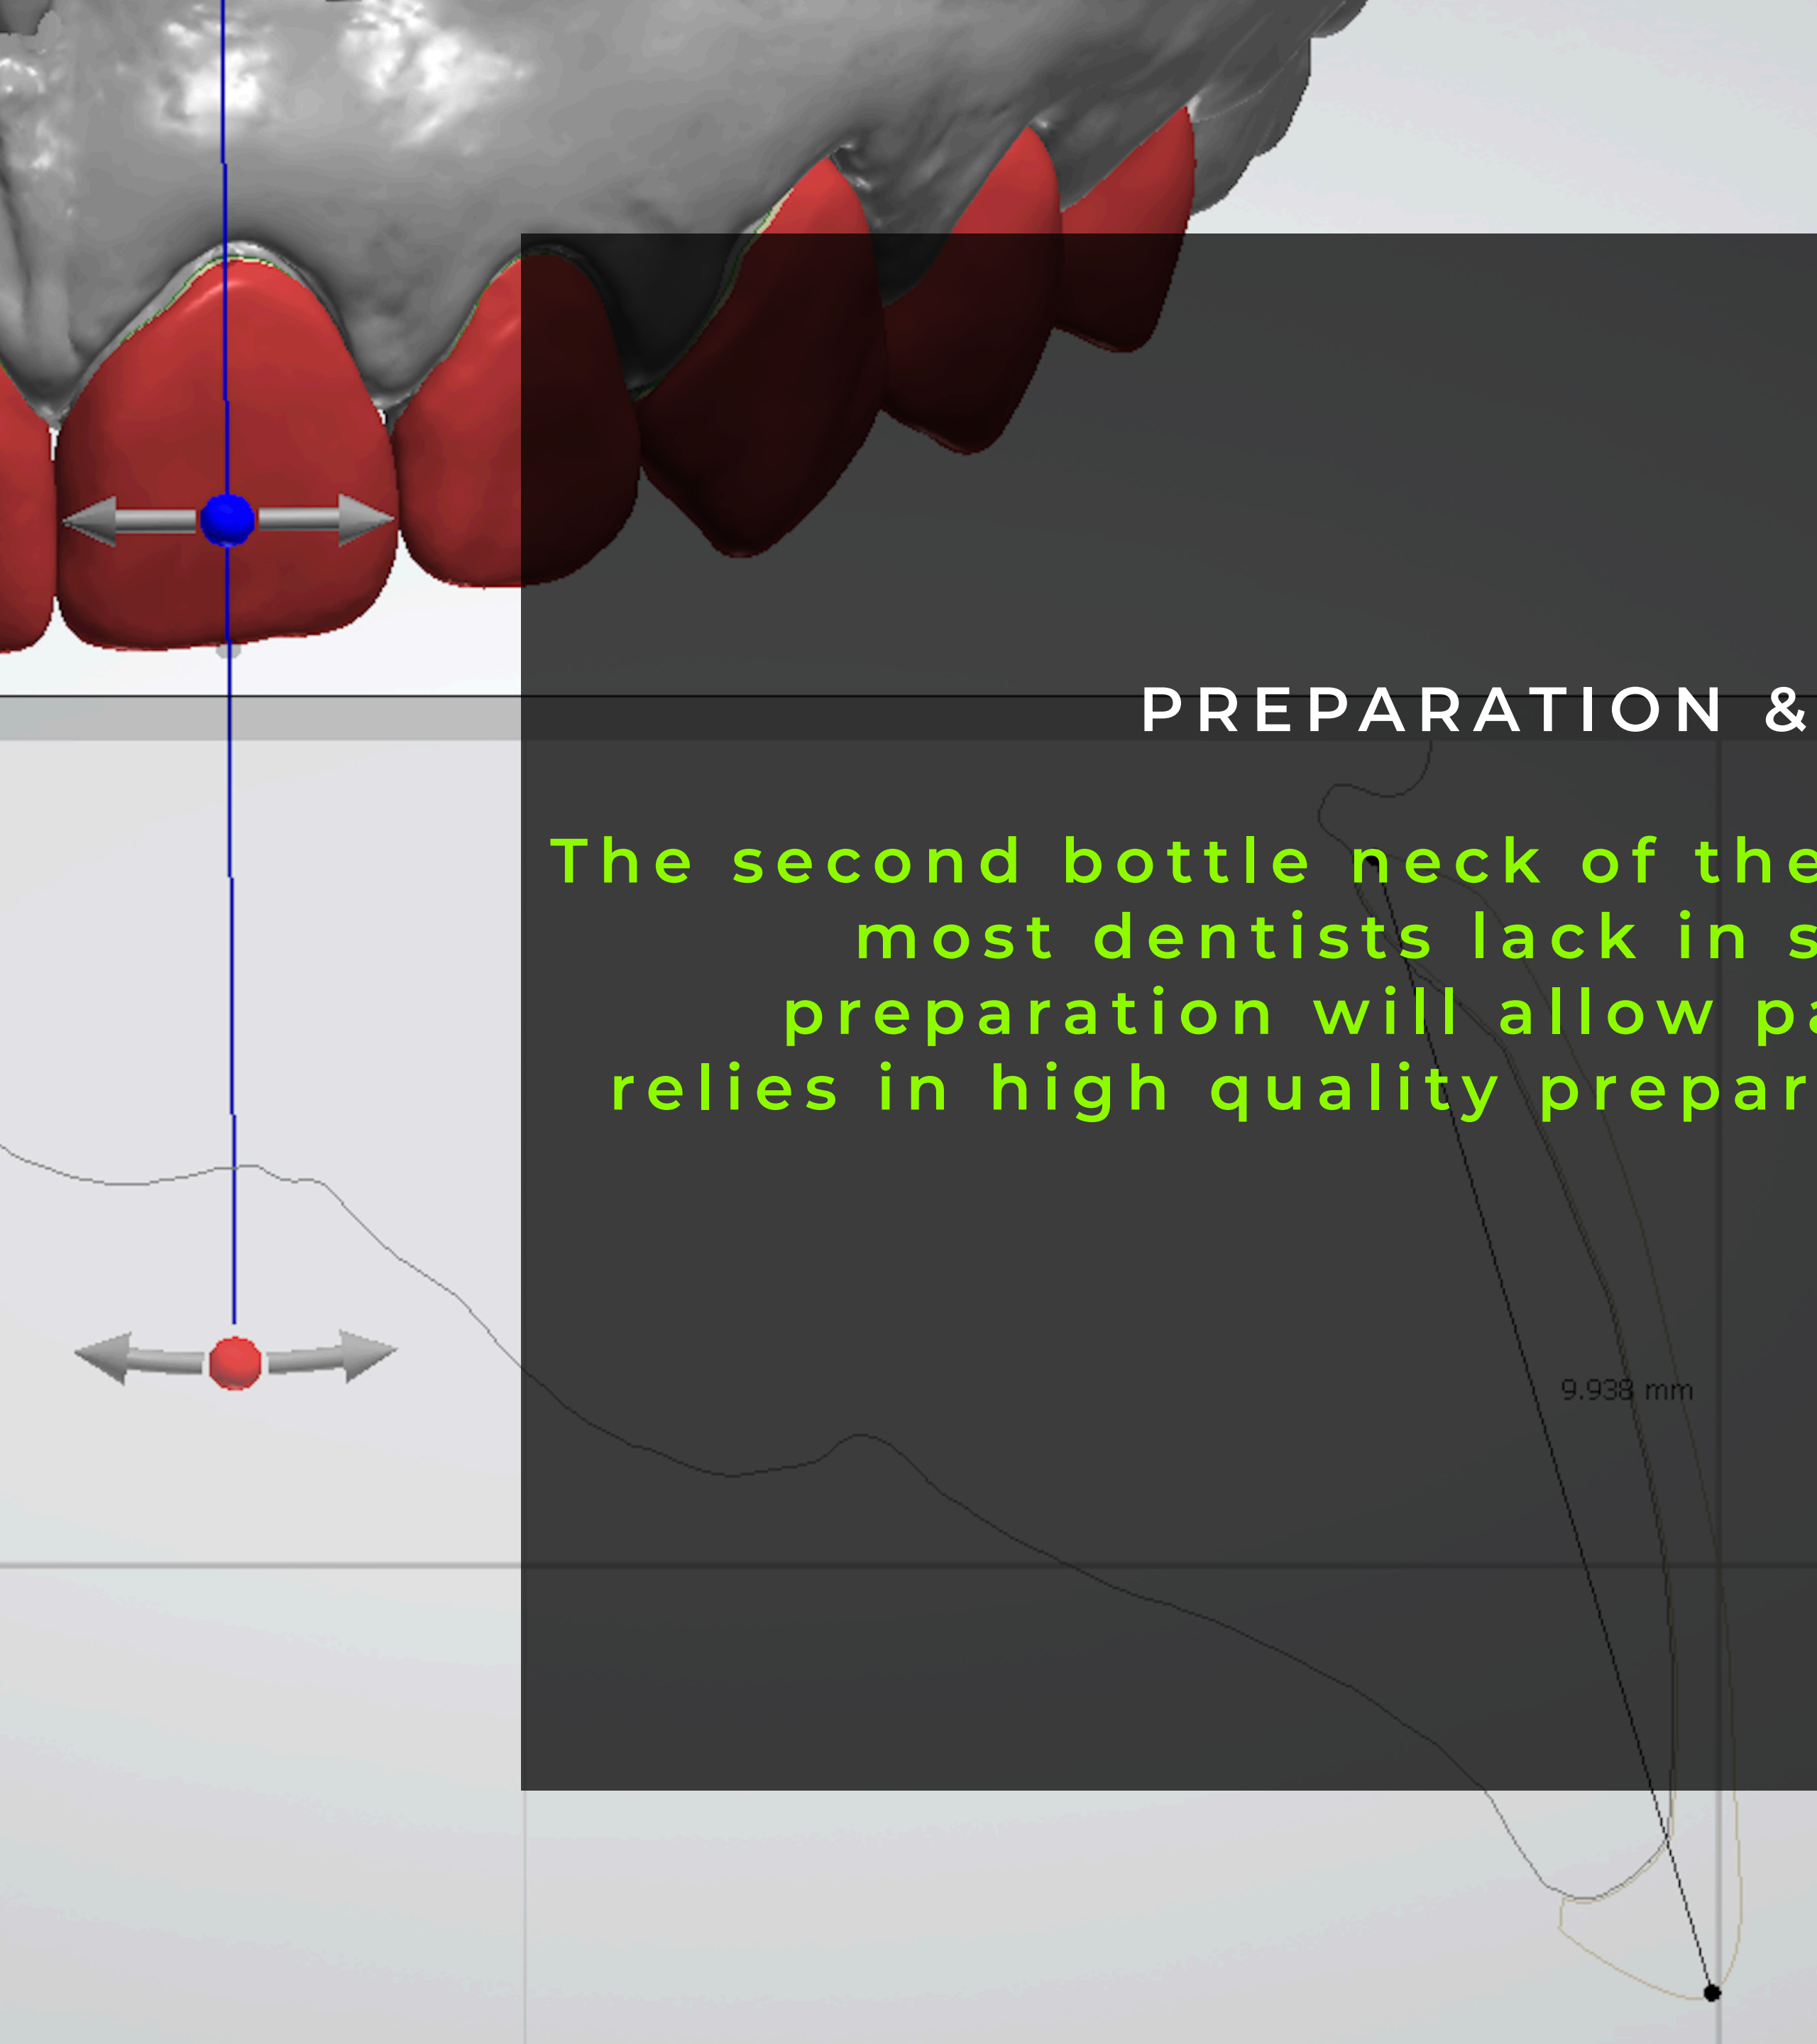

Learning patient behavior when a new self-image is built will bring a more human treatment for the patient. Understanding the roots of self image which impacts self-esteem will allow the dentist to better communicate and present the dramatic changes in one's visual.

MOCKUP & PATIENT PRESENTATION

Predictability is by far one of the biggest advantages of digital dentistry. By a proper design concept, machines will replicate exactly what was designed offering a higher confidence in the final outcome. Mockup session brings also a new challenge as patient presentation will be key for a higher case acceptance rate.

PREPARATION & DIGITAL PREP-CHECK QUALITY CONTROL

The second bottle neck of the puzzle. After impression, here is where most dentists lack in superior quality. A dedicated chapter for preparation will allow participants to learn how digital dentistry relies in high quality preparations after digital prep-check, a quality control protocol.

CEMENTATION PROTOCOLS AND DENTAL MATERIALS

Dental materials is a dynamic market and new products are available. Learning its characteristics will help both dentists and technicians to better select for each case the best material. For each material a cementation protocol must be respected and this chapter will cover different cementation protocols.

OCCLUSION STABILIZATION DEVICES

On the 3D design process, occlusion will be checked as well as all occlusion movements. This will ensure that our smile design is possible as well as the patient will perform 100% his/her perfect occlusion. Devices after treatment are often recommended and understanding them will allow digital dentistry to perfectly design and fabricate.

Architecture OF SMILES

ARCHITECTURE, MARKETING & SALES - BUILDING YOUR BUSINESS

New workflows, new communication with patients, changes that will impact the way dental offices should be designed. Patients motivation and co-authoring their own smile designs will demand dentists to revise the needs of a dental office as well as marketing and sales strategies.

Skyn Day in Spain

Skyn Concept - high performance digital dentistry

Join us for a condensed, comprehensive program designed to empower participants with immediate practical application of knowledge.

In just 1 day, our compact course will guide you through the Skyn Concept introduction in Spain, marking the beginning of an extensive series of LIVE and online courses covering digital dentistry from basic to advanced levels.

We eagerly anticipate your presence and participation in this exciting journey. Looking forward to have you with us,

Best,

Livio Yoshinaga
SKYN Concept Founder

Skyn Day in Spain

Skyn Concept - high performance digital dentistry

Investment ?

375 Euro + IVA

When ?

July 6th, from 9:30h through 19:00h

Where ?

**Avinguda de Ragull, 50
08211 Sant Cugat del Vallès (Barcelona)**
